Market Review and Investment Outlook

by Aviva Investors Asia Pte Ltd

The defining political and market event of 2016 arguably came in the early hours of 9 November. After Hillary Clinton called Donald Trump to concede the US Presidential race, the immediate market reaction was as we, and others, had expected. Uncertainty gripped markets, global equity markets fell rapidly – the US S&P 500 futures market fell by over 5 per cent – the Japanese yen and euro rose on safe-haven flows and emerging market currencies and US Treasury yields fell sharply. Trump's victory rapidly reverberated around global markets. But just a few hours later, that initial reaction was largely reversed. Trump's victory speech was conciliatory in tone and as the reality of his win sunk in, market participants were quick to switch their focus to the potential stimulatory fiscal policy measures he proposed on the campaign trail. Following the initial reaction, global equity markets have risen strongly, US government bond yields have risen, the US dollar has rallied to new highs and commodity prices have also risen.

Global growth and inflation set to rise

While the change in market sentiment was rapid and considerable, it was inevitable and underpinned by conditions pointing to rising prices. We argued in 2016 that investors were ignoring warning signs supporting rising prices globally, as unemployment fell in many economies, and low interest rates continued to support growth, commodity prices stabilised and more supportive fiscal policy was pursued. The International Monetary Fund's latest economic growth projections, while still expecting some recovery, is the most modest forecast since 2010. We think that the balance of risks is for growth to beat that outlook, particularly if other countries join the US in the lowering of taxes. As such, we believe that the global economy will expand in 2017 and 2018, at its fastest pace since 2011.

notes to the fund disclosures

1 Fund performance

Fund performance figures are presented as at 31 December 2016; on bid-to-bid basis with dividends reinvested at the bid price and in Singapore dollar terms.

Source of fund performance - Aviva Ltd

Source of benchmark performance - Fund Manager of Underlying Fund

2 Top 10 holdings

Top 10 Holdings are presented as at 31 December 2016 and 31 December 2015. In the event that these holdings are not available as at the date of this report, they will be represented by the latest available information.

3 Expense ratio

Expense ratios are presented for the 12 months ended 31 December 2016 and for the 12 months ended 31 December 2015. In the event that these ratios are not available as at the date of this report, they will be represented by the latest available period of information.

For the ILP Funds: The expense ratio does not include (where applicable) charges for insurance coverage, brokerage and other transaction costs, performance fee, foreign exchange gains or losses, front or back end loads arising from the purchase or sale of collective investment schemes and tax deducted at source or arising out of income received.

For the Underlying Funds: The expense ratio is calculated in accordance with the IMAS guidelines on the disclosure of expense ratios. It does not include (where applicable) brokerage and other transaction costs, interest expense, foreign exchange gains/losses, front or back end loads arising from the purchase or sale of other funds and tax deducted at source arising out of income received. It is calculated by dividing expenses by daily average NAV, and multiplied by the appropriate factor to annualize the figure and should be disclosed as a percentage.

4 Turnover ratio

Turnover ratios are presented for the 12 months ended 31 December 2016 and for the 12 months ended 31 December 2015. In the event that these ratios are not available as at the date of this report, they will be represented by the latest available period of information.

The turnover ratio is calculated based on the following formula: -

$$\frac{[(\text{Purchases of securities} + \text{Sales of securities}) - (\text{Subscriptions of units} + \text{Redemptions of units})]}{(\text{Average Fund Value over 12 months})} \times 100$$

Based on the above, turnover ratio may be negative should the sum of subscriptions and redemptions of units be more than the sum of purchases and sales of securities.

FINANCIAL STATEMENTS

NOTES TO THE FINANCIAL STATEMENTS

These notes form an integral part of and should be read in conjunction with the financial statements:

1. Summary of significant accounting policies

- 1.1 The financial statements are prepared under the historical cost convention except for investments, which are stated at the market value.
- 1.2 Interest income from investments is recognised on an accrual basis. Dividends are credited to income when the right to receive payment is established.
- 1.3 Expenses are recognised on an accrual basis. The management charges due to the underlying fund houses are taken up as net appreciation/(diminution) in value of investments.
- 1.4 Equity and unit trust investments are valued at the closing market prices as at 31 December 2016.
- 1.5 Debt securities are valued inclusive of accrued interest at bid price from financial institutions as at 31 December 2016.
- 1.6 At 31 December 2016, there were no contingent liabilities or commitments.
- 1.7 The financial statements are stated in Singapore dollars.
- 1.8 Assets and liabilities in foreign currencies are translated into the presentation currency at exchange rates approximately to those ruling at the balance sheet date. Transactions in foreign currencies are translated at rates ruling on transaction dates. Exchange differences are taken to the Capital Account under net appreciation/(diminution) in value of investments during the period.
- 1.9 The cost of disposal is determined on an average cost basis. For Balanced Growth, Capital Growth and Income Growth ILP sub-funds, the gains and losses are taken to the Capital Account under net realised gain/(loss) on sales of investments. Gains and losses on disposal of other ILP sub-funds are taken to the Capital Account and recognised in net appreciation/(diminution) in value of investments during the period.
- 1.10 Tax deducted at source is charged to the Capital Account. Any recoveries of tax deducted at source are credited to the Capital Account when received.

2. Investment structure changes

- 2.1 On 11 July 2016, there is a change from direct investment to feeder fund structure by investing into Schroder Asian Growth Fund A Class and Schroder Singapore Fixed Income Fund - Class I for Balanced Growth, Capital Growth and Income Growth ILP sub-funds.
