KEY FEATURES OF THE SUB-FUND

WHAT ARE YOU INVESTING IN?

- You are investing in an ILP Sub-Fund that feeds 100% into the Underlying Fund, a unit trust constituted in Singapore that aims to provide medium to long term capital appreciation for investors planning to begin to withdraw substantial portions of their investment approximately in 2020.
- The Underlying Fund is a portfolio of GrowthPath Portfolios, which comprise GrowthPath Today, GrowthPath 2020, GrowthPath 2030 and GrowthPath 2040. GrowthPath Portfolios offer you comprehensive asset allocation investment strategies tailored to the time when you expect to begin withdrawing assets. Each Portfolio invests in assets in proportions suggested by its own comprehensive asset allocation strategy that gradually becomes more conservative as the respective

Refer to paragraph 5 on Page 5 of the Underlying Fund’s Prospectus for information on features of the Sub-Fund.

¹ For ILP Sub-Funds that feed 100% into an underlying CIS fund, some of the information provided below could be similar to the underlying CIS fund.

² In order for units in the ILP sub-fund to be classified as Excluded Investment Products, the investment objectives and investment focus of the ILP sub-fund, and investment approach of the manager have to be stated in the product summary:

- to invest only in deposits or other Excluded Investment Products; and
- not to engage in securities lending or repurchase transactions for the ILP sub-fund.

The definition of “Excluded Investment Product” can be found in Annex 1 to the Notice on Recommendations on Investment Products [Notice No. FAA-N16] at <http://www.mas.gov.sg/Regulations-and-Financial-Stability/Regulations-Guidance-and-Licensing/Financial-Advisers/Notices.aspx>.

<p>maturity dates of the Portfolios approach, except for GrowthPath Today that is already in its most conservative phase.</p> <ul style="list-style-type: none"> • Currently, the Underlying Fund does not aim to make regular distributions. 	
Investment Strategy	
<p>GrowthPath Portfolios</p> <ul style="list-style-type: none"> • Each Portfolio seeks to maximise assets for retirement or other purposes consistent with the risk level that investors may be willing to accept given their investment time horizon. • Generally, investors with a longer time horizon have greater tolerance for risk than investors with a shorter time horizon. Thus, Portfolios with longer time horizons will invest more in equities to provide greater opportunity for capital appreciation over the long-term, while Portfolios with shorter time horizons will invest more in bonds to reduce risk and volatility. Returns are expected to be lower for Portfolios with shorter time horizons. • The investment strategy of each Portfolio is to allocate assets amongst 4 main asset classes: Singapore equities, global equities, Singapore bonds and global bonds. Other asset classes may be included for tactical asset allocation purposes. • Asset allocation is based on a proprietary model developed by the Managers, which is continuously refined and reviewed to take into account the changing investment environment. • To meet the investment objective and strategy, currently each Portfolio may invest in the Current Underlying Entities. • Each Portfolio and the Current Underlying Entities may hold liquid assets for liquidity purposes and may use or invest in FDIs for the purposes of hedging existing positions, efficient portfolio management, or a combination of both purposes. <p><u>The Underlying Fund</u></p> <ul style="list-style-type: none"> • GP 2020 is designed to produce total return for investors expecting to hold until and begin withdrawing assets around the year 2020. As 2020 approaches, the allocation will become less risky and have lower expected returns. • For GP 2020, the approximate initial model percentage allocation as at 30 August 2002 is Singapore Equities: 20%; Global Equities: 43%; Singapore Bonds: 12% and Global Bonds: 25%. The approximate model percentage allocation as at 1 July 2017 is Singapore Equities: 7.00%; Global Equities: 22%; Singapore Bonds: 18%; and Global Bonds: 53%. • GP 2020 will automatically terminate and be merged with GrowthPath Today on its maturity date on 31 December 2020. You will be informed of the automatic termination and merger and your options in relation thereto at least 2 months before the said maturity date. 	<p>Refer to paragraph 5 on Page 5 of the Underlying Fund's Prospectus for information on the investment strategy of the Sub-Fund.</p>
Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> • The Managers of the Underlying Fund, Growth Portfolios and the UOBAM Underlying Entities are UOB Asset Management Ltd. • The Trustee of the Underlying Fund is State Street Trust (SG) Limited. • The Custodian of the Underlying Fund is State Street Bank and Trust Company, Singapore Branch. <p>With effect from 1 April 2017, State Street Trust (SG) Limited will be appointed as the new trustee of the Underlying Fund. The current global custodian, fund administrator and registrar of the Underlying Fund will be replaced by State Street Bank and Trust Company, Singapore Branch.</p>	<p>Refer to paragraphs 2 and 3 on Pages 2 and 4 of the Underlying Fund's Prospectus for information on these entities.</p>
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>The value of the Underlying Fund and its distributions (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:</p>	<p>Refer to paragraph 7 on page 21 of the Underlying Fund's Prospectus for information on risks of the Sub-Fund.</p>

Market and Credit Risks	
<ul style="list-style-type: none"> ● You are exposed to the market risks in the global markets. ○ Prices of the securities that the Underlying Fund (and its Underlying Entities) invests in may be affected by changes in economic conditions, interest rates and the market’s perception of the securities, which in turn may affect the value of your investment. 	
Liquidity Risks	
<ul style="list-style-type: none"> ● You are exposed to liquidity risk ○ The ILP Sub-Fund is not listed and you can redeem only on Business Days. There is no secondary market for the ILP Sub-Fund. All realisation requests should be to Aviva Ltd. ● You are exposed to liquidity risk of investments. ○ Investments by the Underlying Fund in some Asian and/or emerging markets often involve a greater degree of risk due to the nature of such markets which do not have fully developed services such as custodian and settlement services. There may be a greater degree of volatility in such markets because of the speculative element, significant retail participation and lack of liquidity. 	
Product-Specific Risks	
<ul style="list-style-type: none"> ● You are exposed to asset allocation model risk. ○ The Underlying Fund will be managed utilising an asset allocation model developed by the Managers. GP 2020 and the Managers cannot offer any assurance that the recommended allocation will either maximise returns or minimise risks, or any assurance that a recommended allocation will prove the ideal allocation in all circumstances for every investor with a particular time horizon. ● You are exposed to equities investment risk. ○ Equities investment risks include both short-term and prolonged price declines. Mid- to small-capitalisation equities tend to present greater risks than large-capitalisation equities because they are generally more volatile and can be less liquid. ● You are exposed to risks relating to derivatives. ○ An investment in a FDI (including foreign exchange forward contracts and equity index future contracts) may require the deposit of an initial margin and additional deposit of margin on short notice if the market moves against the investment position. If the required margin is not provided in time, the investment may be liquidated at a loss. Therefore, it is essential that investments in FDIs are monitored closely. The Managers have controls for investments in FDIs and have in place systems to monitor the FDI positions of GP 2020. ● You are exposed to concentration in the Underlying Entities. ○ The Underlying Fund may have a large concentration of investments in each relevant Underlying Entity and could consequently be subject to significant losses where the relevant Underlying Entity declines in value or is otherwise adversely affected. The Underlying Fund will be subject to different levels and combinations of risks based on its allocation among the Underlying Entities and the potential impact that the losses and risks of an Underlying Entity may have on the Underlying Fund would depend on the size of the Underlying Fund’s allocation to it. <p>You should be aware that the Underlying Fund may be exposed to other risks of an exceptional nature from time to time.</p>
