The Fund’s ability to use such instruments successfully depends on the Investment Manager’s ability to accurately predict movements in stock prices, interest rates, currency exchange rates or other economic factors and the availability of liquid markets. If the Investment Manager’s predictions are wrong, or if the financial derivative instruments do not work as anticipated, the Fund could suffer greater losses than if the Fund had not used such instruments.</p> <p>You are exposed to emerging and frontier markets risk. Equity prices fluctuate daily, based on many factors including general, economic, industry or company news.</p> <p>You are exposed to leverage risk. The Fund uses derivatives for leverage, which makes it more sensitive to certain market or interest rate movements and may cause above-average volatility and risk of loss.</p> <p>You are exposed to onshore renminbi currency risk. Currency control decisions made by the Chinese government could affect the value of the Fund’s investments and could cause the Fund to defer or suspend redemptions of its Shares.</p> <p>You are exposed to operational risk.
