Aberdeen Standard Select Portfolio – Aberdeen Standard Singapore Equity Fund (“ILP Sub-Fund”)

This Fund Summary should be read in conjunction with the Product Summary

Structure of ILP Sub-Fund

The ILP Sub-Fund is an open-ended feeder fund and invests all or substantially all of its assets into the Underlying Fund, Aberdeen Standard Select Portfolio – Aberdeen Standard Singapore Equity Fund (the “Underlying Fund”), a sub-fund under a Singapore-authorised umbrella unit trust, Aberdeen Standard Select Portfolio which offers a group of separate and distinct portfolios of securities or obligations, each of which being a sub-fund investing in different securities or portfolios of securities.

The units in the ILP Sub-Fund are not classified as Excluded Investment Products.

Information on the Manager of the underlying fund (“Underlying Manager”)

The Underlying Manager of Aberdeen Standard Select Portfolio – Aberdeen Standard Singapore Equity Fund (the “Underlying Fund”)

Aberdeen Standard Investments (Asia) Limited(the “Manager”) is the manager of the Underlying Fund and is licensed and regulated by the Monetary Authority of Singapore. The Manager is a wholly-owned subsidiary of the Aberdeen Asset Management Group (the “Aberdeen Group”) and was established in Singapore in May 1992 as the regional headquarters of the Aberdeen Group to oversee all of its Asia-Pacific assets, including collective investment schemes. As at end September 2017, Aberdeen Standard Investments (Asia) Limited had over US$66.3 billion worth of assets under its management.

<u>The Aberdeen Group</u>

Aberdeen Asset Management (‘Aberdeen’) is the holding company for an asset management group managing equities, fixed income, property, alternatives, quantitative strategies and multi-asset, as well as tailored investment solutions spanning multiple asset classes and strategies. Our clients include banks, national and corporate pension funds, insurers, sovereign wealth funds and other investment institutions, plus intermediaries managing money for private investors. The company was formed in 1983 via the MBO of an investment management contract for a small investment trust. Over the years we have expanded through a combination of acquisition and organic growth. As at end September 2017, assets under management were US$401.2 billion.

Other Parties

There is no other party who advises the Manager in the management of the Underlying Fund.
The auditor of the ILP Sub-Fund is PricewaterhouseCoopers LLP.

Investment Objective, Focus & Approach

The investment objective of the underlying Aberdeen Standard Select Portfolio – Aberdeen Standard Select Singapore Equity Fund is to provide medium to long-term capital growth from a portfolio of Singapore equities.

The Underlying Manager’s investment philosophy is that markets are not always efficient. Superior returns are therefore attainable by identifying good securities (defined in terms of the fundamentals which the Underlying Manager believes will drive security prices over the long term) cheaply. This is achieved primarily through first-hand stock research and active management of portfolios.

In emphasising the primacy of corporate performance, the Underlying Manager tends to disregard the role of indices and the concept of relative return. Market capitalisation appears an unsound theoretical basis for a ‘neutral’ portfolio position, being an inherently historical construct, while consensus-driven demand is potentially distorting. Absolute return is held to be more important over the long term, with risks controlled primarily at the security level.

In respect of the Underlying Fund, the Underlying Manager may, in accordance with the provisions of the Deed of the Aberdeen Standard Select Portfolio, invest in the securities of companies or institutions domiciled in, operating principally from, or deriving significant revenue from the relevant country or countries (as the case may be).

Risks

The value of the Underlying Fund may rise or fall. Investments in the Underlying Fund are subjected to various risks such as market risks, fluctuations in interest rates and foreign exchange rates, political instability, exchange controls, change in taxation and foreign investment policies and other restrictions and controls which may be imposed by the relevant authorities in other countries. The risk factors set our herein may cause you ro lose some or all of your investment. These risks are elaborated upon below:

Market Risk

The usual risks of investing in listed and unlisted securities apply. Prices of securities may rise or fall in response to changes in economic conditions, political conditions, interest rates, and market sentiment. These may cause the price of Units in the Underlying Fund to go up or down as the price of Units is based on the current market value of the investments of the Underlying Fund.

Political Risk

The Underlying Fund invest in countries with less stable political and economic environments and in securities' markets with lower levels of regulation and different accounting, commercial and market practices than those of acceptable international standards are likely to increase the overall risk of the Underlying Fund.

Liquidity Risk

The securities markets of some countries lack the liquidity, efficiency, regulatory and supervisory controls of more developed markets. The lack of liquidity may adversely affect the value or ease of disposal of assets, thereby increasing the risk of investing in such markets.

Settlement Risk/Transactions Risk

The property of the Underlying Fund is held by the Trustee on behalf of the Holders, separate from the Trustee's assets. It is therefore protected in the event of the insolvency of the Trustee. There is, however, still a risk that there may be a temporary delay in subscriptions and redemptions of the Units.

Regulatory Risk

The investment objectives and parameters of the Underlying Fund are restricted by applicable legislation and regulatory guidelines. There may be a risk that legislative or regulatory changes may make it less likely for the Underlying Fund to achieve its objectives.

Currency Risk /Exchange Rate Risk

The assets and income of the Underlying Fund will be substantially denominated in currencies other than the Singapore dollar. Currency fluctuations between foreign currencies and the Singapore dollar may affect the income and valuation of the assets of the relevant Underlying Fund in ways unrelated to business performance. Investors should note that the Underlying Manager generally does not hedge the currency positions of the Underlying Fund unless circumstances require it and/or as mentioned in the Aberdeen Select Portfolio Prospectus.

Taxation

Investors should note that the proceeds from the sale of securities in some markets or the receipt of any dividends or other income may be or may become subject to tax, levies, duties or other fees or charges imposed by the authorities in that market, including taxation levied by withholding at source. Tax law and practice in certain countries into which the Underlying Fund invests or may invest in the future (in particular other emerging markets) is not clearly established. It is possible therefore that the current interpretation of the law or understanding of practice might change, or that the law might be changed with retrospective effect. It is therefore possible that the Underlying Fund could become subject to additional taxation in such countries that is not anticipated either at the date of the Aberdeen Select Portfolio Prospectus or when investments are made, valued or disposed of.

Repurchase or Securities Lending Agreements

While the value of the collateral of repurchase or securities lending agreements will exceed the value of the securities transferred, if there is a sudden market movement, there is a risk that the value of such collateral may fall below the value of the securities transferred.

In relation to repurchase transactions, investors should note that (A) in the event of the failure of the counterparty with which cash of the Underlying Fund has been placed, there is the risk that collateral received may yield less than the cash placed out, whether because of inaccurate pricing of the collateral, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) (i) locking cash in transactions of excessive size or duration, (ii) delays in recovering cash placed out, or (iii) difficulty in realising collateral may restrict the ability of the Underlying Fund to meet redemption requests, security purchases or, more generally, reinvestment; and that (C) repurchase transactions will, as the case may be, further expose the Underlying Fund to risks similar to those associated with optional or forward derivative financial instruments, which risks are further described in other sections of the Aberdeen Select Prospectus. Securities lending involves counterparty risk, including the risk that the loaned securities may not be returned or returned in a timely manner and/or at a loss of rights in the collateral if the borrower or the lending agent defaults or fails financially. This risk is increased when the Underlying Fund's loans are concentrated with a single or limited number of borrowers. Investors must notably be aware that (A) if the borrower of securities lent by the Underlying Fund fail to return these, there is a risk that the collateral received may realise less than the value of the securities lent out, whether due to inaccurate pricing, adverse market movements, a deterioration in the credit rating of issuers of the collateral, or the illiquidity of the market in which the collateral is traded; that (B) in case of reinvestment of cash collateral such reinvestment may (i) create leverage with corresponding risks and risk of losses and volatility, (ii) introduce market exposures inconsistent with the objectives of the Underlying Fund, or (iii) yield a sum less than the amount of collateral to be returned; and that (C) delays in the return of securities on loans may restrict the ability of the Underlying Fund to meet delivery obligations under security sales.

Derivative Usage
The Underlying Fund may use financial derivative instruments for the purposes of hedging and/or efficient portfolio management to the extent permitted in the Deed. In no event are financial derivative instruments used to lever an Underlying Fund.

Total Derivatives Exposure
The Underlying Manager will ensure for the Underlying Fund that its exposure relating to financial derivative instruments does not exceed the total net value of its portfolio. The Underlying Manager will ensure that the global exposure of the Underlying Fund to financial derivative instruments or embedded financial derivative instruments will not exceed 100% of the net asset value of the Underlying Fund at all times. Such exposure will be calculated using the commitment approach as described in, and in accordance with the provisions of, the Code of Investment Collective Scheme issued by the Monetary Authority of Singapore ("Code").

Execution of Trades
An automated trading system provides for the capture of orders from the fund manager for transmission to an independent dealing function which facilitates management of the dealing process and, once executed, onward transmission to the back office trade processing function. It is used for the execution of fixed and equity securities, exchange-traded derivatives and OTC derivatives.

Description of risk management and investment control procedures we adopt
An electronic guideline monitoring system, which is integrated within the trading platform, gives pre-deal alerts to fund managers and post-deal exception reports to the Investment Control Department in respect of actual and potential breaches of investment restrictions. This includes total derivatives exposure and counterparty exposure. Such system is maintained independently of the fund managers by the Investment Control Department. Monitoring for derivatives and physical assets takes place on a pre-trade basis.

We will ensure that the risk management and investment control procedures adopted are adequate and have been implemented and that we have the necessary expertise to control and manage the risks relating to the use of financial derivatives.

In the event an Underlying Fund nets its OTC derivative positions, such netting arrangements shall satisfy the relevant conditions described in the Code, including obtaining the legal opinions as stipulated in the Code.

Counterparty Risk
In some markets there may be no secure method of delivery against payment which would avoid credit risk exposure to a counterparty. Each Underlying Fund may enter into transactions and other contracts that entail a credit exposure to certain counterparties. To the extent that a counterparty defaults on its obligation and the Underlying Fund is delayed or prevented from exercising its rights with respect to the investments in its portfolio, it may experience a decline in the value of its position, a loss of income and possible additional costs associated with asserting its rights. Where financial instruments are dealt in over-the-

counter markets ("OTC"), it may be necessary to make payment on a purchase or delivery on a sale before receipt of the securities or, as the case may be, sale proceeds.

Subject to the provisions of the Code:

(a) the risk exposure of the Underlying Fund to a counterparty in an OTC derivative transaction may not exceed 10% of its net assets when the counterparty is a credit institution, which has its registered office in a country which is a EU Member State or if the registered office of the credit institution is situated in a non-EU Member State provided that it is subject to prudential rules equivalent to those in EU Member States;

(b) the Underlying Fund is restricted to dealing with OTC derivative counterparties, which are rated between AAA and A- (S&P/Fitch) or Aaa and A3 (Moody's) for non-collaterised business counterparties, or between AAA and BBB+ (S&P/Fitch) or Aaa and Baa1 (Moody's) for collaterised business counterparties, or such ratings as may be allowed by the Code, as amended from time to time. Where multiple external ratings are available, the following is taken into account:

    (i) if there are any differences between ratings, the lowest published rating is used;

Where the counterparty is not rated by multiple external rating agencies, the following is taken into account:

    (ii) if there is only one or less external rating available (Fitch, S&P, Moody's), then the full financial statements of the counterparty is to be provided by the front office and reviewed by the counterparty credit risk team in order to formulate a credit opinion.

The counterparty will then be brought to the Derivative and Credit Oversight Committee for final credit sanctioning.

Where financial instruments are dealt on cash "delivery versus payment" type transactions (DVP), there is a replacement risk if the counterparty is unable to deliver the securities or the cash to the Underlying Fund. The Underlying Fund is restricted to dealing with DVP Cash brokerage counterparties, which are rated between AAA and BBB- (S&P/Fitch) or Aaa and Baa3 (Moody's).

If there are no external ratings available at all (Fitch, S&P, Moody's), then the full financial statements of the counterparty is to be provided by the front office and reviewed by the counterparty credit risk team in order to formulate a credit opinion and an internal rating.

All counterparties are reviewed and rated at least once a year by the Counterparty Credit Risk team.

Capacity Restrictions
There is a possibility that an Underlying Fund may be closed to new subscriptions or switches into such Underlying Fund without prior notice to its holders in certain circumstances, for instance, where the Underlying Fund has reached a size such that the capacity of the market and/or the capacity of the relevant Investment Adviser has been reached, and where to permit further inflows would be detrimental to the performance of the Underlying Fund. In such case, the Underlying Manager may also need to restrict or close new subscriptions into the Underlying Fund.

Specific Risk Associated with an Investment in the Underlying Fund
Exposure to a single country market increases potential volatility because the concentration in a single country market makes it less diversified compared to an exposure to specific regional or global markets.

Fees and Charges

In addition to the fees and charges shown in the Product Summary, the following fees are also payable through deduction from the asset value of the Underlying Fund:

Payable by the Underlying Fund from invested proceeds

Fees Payable by the Underlying Fund	
Annual management fee	1.50%

Annual trustee fee	Maximum 0.15% subject always to a minimum of S$10,000 per annum

Past Performance[1] and Benchmark of the Underlying Fund: as at 30 November 2017

NOTE: PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE PERFORMANCE.

Cumulative Performance and Benchmark of the Underlying Fund

* *Aberdeen Standard Select Portfolio – Aberdeen Standard Singapore Equity Fund SGD : Incepted on 5 December 1997*

1 *Performance shown in fund currency and calculated before sales charges are deducted. Fees and charges payable through deduction of premium or cancellation of units are excluded in deriving the performance. Performance is calculated on the assumption that all dividends and distributions are reinvested, taking into account all charges which would have been payable upon such reinvestment.*

2 *Benchmark data is only available from 31 August 1999 following the takeover of index calculation by FTSE on 10 January 2008.*

Expense Ratio and Turnover Ratio of the Underlying Fund

Underlying Fund	Expense Ratio	Turnover Ratio
Aberdeen Standard Select Portfolio – Aberdeen Standard Singapore Equity Fund	1.63%	5.17%

The expense and turnover ratios stated in the table above are for the period ended 31 March 2018.

The expense ratio is calculated in accordance with the Investment Management Association of Singapore guidelines on the disclosure of expense ratios. It does not include (where applicable) brokerage and other transaction costs, performance fee, interest expense, foreign exchange gains /losses, front or back-end loads arising from the purchase or sale of other funds and tax deducted at source or arising out of income received. It is calculated by dividing expenses by daily average NAV, and multiplied by the appropriate factor to annualise the figure and is disclosed as a percentage.

The turnover ratio is calculated based on the lower of purchases and sales expressed as a percentage of the daily average net asset value.

Soft Dollar Commissions or Arrangements

The Underlying Manager do not receive soft-dollar commissions or arrangements for the Underlying Fund. In the management of the Underlying Fund, the investment managers may receive or enter into soft-dollar commissions/arrangements for the underlying funds. The investment managers will comply with applicable regulatory and industry standards on soft-dollars. Any goods or services supplied under any soft-dollar commissions/arrangements to the investment managers shall be directly relevant to investment research, which is used to assist in the provision of investment management services.

The investment managers shall not receive goods and services such as travel, accommodation or entertainment costs, office administrative computer software, purchase or rental of standard office equipment or ancillary facilities, employees' salaries or any other goods and services prohibited by the applicable regulator.

The investment managers shall ensure that the broker has agreed to provide best execution for the transactions and that no unnecessary trades are entered into in order to qualify for such soft-dollar commissions/arrangements.

Conflicts of Interest

The Underlying Manager may effect transactions in which they have, directly or indirectly, an interest which may involve a potential conflict with their duty to the Underlying Fund. The Underlying Manager shall not be liable to account to the Underlying Fund for any profit, commission or remuneration made or received from or by reason of such transactions or any connected transactions nor will their fees, unless otherwise provided, be abated. They will ensure that such transactions are effected on terms which are not less favourable to the Sub-Funds than if the potential conflict had not existed. Such potential conflicting interests or duties may arise because the Underlying Manager may have invested directly or indirectly in the Sub-Funds. More specifically, the Underlying Fund, under the rules of conduct applicable to it, must try to avoid conflicts of interests and, where they cannot be avoided, ensure that investors are fairly treated.

The Underlying Manager may, as appropriate, make sales and purchases of assets of the Underlying Fund to or from other companies in the same manner as if the other party were at arm's length with the Underlying Manager.

The Underlying Manager may from time to time have to deal with competing or conflicting interests of the Underlying Fund with other funds managed by the Underlying Manager. For example, the Underlying Manager may make a purchase or sale decision on behalf of some or all of the other funds managed by them without making the same decision on behalf of the Underlying Fund, as a decision whether or not to make the same investment or sale for the Underlying Fund depends on factors such as the cash availability and portfolio balance of the Underlying Fund. However, the Underlying Manager will use reasonable endeavours at all times to act fairly and in the interests of the Underlying Fund. In particular, after taking into account the availability of cash and relevant investment guidelines of the other funds managed by the Underlying Manager and Underlying Fund, the Underlying Manager will endeavour to ensure that securities bought and sold will be allocated proportionately as far as possible among the Underlying Fund and the other funds managed by the Underlying Manager.

The factors which the Underlying Manager will take into account, when determining if there is any conflict of interest as described in the paragraph above, include the aggregation of the purchase of the assets of the Underlying Fund. To the extent that another fund managed by the Underlying Manager intends to purchase substantially similar assets, the Underlying Manager will ensure that the assets are allocated fairly and proportionately and that the interests of all investors are treated equally between the Underlying Fund and the other funds.

The Underlying Manager may purchase, hold or redeem units in the Underlying Fund for our own account. If there is any conflict of interest arising as a result of such dealing, the Underlying Manager and the Trustee will resolve the conflict in a just and equitable manner as they deem fit.

The Underlying Manager and the Trustee shall conduct all transactions with or for the Underlying Fund on an arm's length basis.

Associates of the Trustee may be engaged to provide financial, banking and brokerage services to the Underlying Fund. Such services where provided, will be on an arm's length basis.

Associates of the Underlying Manager may be engaged to provide services such as financial, banking or brokerage services to the Underlying Fund. Such services where provided, will be on an arm's length basis.
The Trustee is presently also offering registrar services to the Underlying Funds while the Custodian, a party related to the Trustee, is presently also providing fund administration and valuation services to the Underlying Fund. These services are

provided on an arm's length basis and the fees for these services are permitted to be paid out of the Deposited Property of the Underlying Fund under the provisions of the Deed.

Reports

The financial year-end of the ILP Sub-Fund is 30 June. Aviva Ltd will make available semi-annual report and annual audited report of the ILP Sub-Fund within 2 months and 3 months respectively from the relevant reporting periods.

In addition, Aviva Ltd will make available financial reports of the Underlying Fund as they become available from the Investment Manager. Policyholders can access these reports via the Aviva website www.aviva.com.sg.

Specialised ILP Sub-Fund

The ILP Sub-Fund is not a specialised sub-fund as set out in MAS Notice 307 on Investment-Linked Policies issued by the Monetary Authority of Singapore.
