KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>The value of the ILP Sub-Fund may rise or fall. The following key risk factors may cause you to lose some or all of your investment:</p>	<p>Refer to "Risks" section of the Underlying Fund's Prospectus for further information.</p>
Market and Credit Risks	
<p>You are exposed to Credit Risk of Issuers</p> <p>The Underlying Fund may be exposed to the credit/default risk of bonds that it invests in. In the event of bankruptcy or default of an issuer, the Underlying Fund may experience losses and incur costs.</p> <p>The actual or perceived downgrading of a rated debt security or its issuer could decrease the value and liquidity of the security, and may have an adverse impact on the Underlying Fund. However, the Underlying Fund may continue to hold it to avoid a distressed sale.</p> <p>You are exposed to Currency Risks.</p>	

<p>Foreign currency exchange rate movements are likely to influence the returns to investors in Singapore, hence investors may be exposed to exchange rate risks.</p> <p>You are exposed to Emerging Market Risks The Underlying Fund may invest in one or more emerging markets (including certain Asian countries) and may be subject to a higher than average volatility than investing in more developed markets due to greater political, tax, economic, social, foreign exchange, custodial, liquidity, regulatory or other risks.</p> <p>You are exposed to Foreign Investment Restriction Risks Some countries prohibit or restrict investment, or the repatriation of income, capital or the proceeds from sale of securities. The Underlying Fund may incur higher costs investing in these countries. Such restrictions may delay the investment or repatriation of capital of the Underlying Fund.</p> <p>You are exposed to Interest Rate Risks An increase in interest rates may adversely affect the value of the bonds held by the Underlying Fund.</p> <p>You are exposed to Sovereign Debt Risks The Underlying Fund may invest in bonds issued or guaranteed by governments or authorities, which may involve political, economic, default, or other risks.</p>	
Liquidity Risks	
<p>You are exposed to Liquidity Risk Redemptions may be suspended in certain circumstances detailed in the Underlying Fund's Singapore Prospectus.</p>	
Product-Specific Risks	
<p>You may be exposed to Derivatives Risks The use of derivatives may expose the Underlying Fund to a higher degree of risk. Derivative contracts can be highly volatile and a relatively small market movement may have a potentially larger impact on derivatives than on standard bonds or equities. Leveraged derivative positions can hence increase the Underlying Fund's volatility. The Underlying Fund may sustain loss as a result of the failure of a derivatives counterparty to comply with the terms of the derivatives contract.</p> <p>You may be exposed to Distressed Securities Risks The Underlying Fund may invest in securities issued by a company that is in financial difficulty or in default. This involves significant risk. There is no guarantee that any exchange offer or re-organisation will be successfully completed.</p> <p>You are exposed to Non-Investment Grade Bonds Risks The Underlying Fund may invest in non-investment grade bonds. This may subject the Underlying Fund to higher credit/default risks, volatility and liquidity risks than investment grade bonds.</p>
