In the event of a bankruptcy or insolvency of a counterparty, the Underlying Fund could experience delays in liquidating the position and significant losses.</p> <p><b>You are exposed to hedging risks.</b>  Any attempts to reduce certain risks may not work as intended. Any measures that the Fund takes that are designed to offset specific risks may work imperfectly, may not be feasible at times, or may fail completely.</p> <p><b>You are exposed to concentration risks.</b>  Investing in a limited number of issues, industries, type of securities or within a limited geographical can be more risky than investing more broadly. The Underlying Fund's value may fall where the area of concentration is heavily affected by an adverse event.</p> <p><b>You are exposed to securities lending risks.</b>  The Underlying Fund may lend its portfolio securities to financial institutions and expose to the risk that the borrower defaults and fails to return the borrowed securities.
