Liquidity Risks

The ILP Sub-Fund is not listed on the Singapore Exchange and you can redeem only on Business Days through Aviva. In respect of Singapore investors, there is no secondary market for the ILP Sub-Fund.

Your redemption request may be deferred.

If you submit a redemption request on a Dealing Day where total redemption requests exceed 10% of the Underlying Fund's shares in issue, your redemption request may be deferred to subsequent Dealing Days.

Product-Specific Risks

You are exposed to concentration risks

The Underlying Fund concentrates investments in securities of issuers from a particular country or region and/or the Sub-Investment Manager makes investment decisions primarily on the basis of company-specific factors which may result in a substantial portion of the Underlying Fund's investments consisting of securities of companies doing business in one industry or product field. Such a concentration of assets could increase the potential for volatility and risk of loss, especially in periods of pronounced market volatility.

You are exposed to custody and settlement risks

The Underlying Fund may be exposed to risks where it invests in markets where custodial and/or settlement systems are not fully developed or in markets which present specific risks in relation to the settlement and safekeeping of securities.

You are exposed to derivatives risks

Derivatives in general involve special risks and costs and may result in losses to the Underlying Fund. The successful use of derivatives requires sophisticated management and the Underlying Fund will depend on the ability of the Investment Manager or Sub-Investment Manager to analyse and manage derivative transactions. A liquid secondary market may not always exist for the Underlying Fund's derivatives positions at any time. In addition, over-the-counter instruments also expose the Underlying Fund to risk that a counterparty will not meet its obligations to the Underlying Fund because of, for instance, a dispute over its terms or a credit or liquidity problem, which may cause the Underlying Fund to suffer a loss.
